Don't listen to any of that junk. Fish take baits and flies ALL the time up there. The only people who say that are those who aren't very good at catching fish and they resort to those tactics.

In 1 hole in 2 days last year I hooked probably 60-70 fish and probably about 40 were kings. I used estaz eggs and simple rabbit zonker streamers. Colors turn off and on all the time up there so be prepared. I have about 10 different colored estaz eggs and streamers in white, black, red, and chartreuse worked well for both the salmon and the steelhead. Chartreuse especially for the steel.
