Lol I ran outta tan foam dude, no more hoppers until my girl drags me to Michael's haha. It's amazing what you can get at those craft stores...

Lvl2nymph - I come and go in spurts lol. Sometimes I need some insight, and like to give back what I can to the forum

Marv -

I tie the stones smaller than the naturals...

#8 Scud hook with a Black tung bead sized to the hook

Wrap the hook with lead to get that girl down

Half dozen moose body hairs split in half for the tails

Light Olive UV ice dub/Yellow ice dub mix for the body/thorax

2-3 sets of partridge palmered for the legs

SM purple wire

Mottled Bustard thin skin for the back. Then tie in another piece over the thorax

Here's a brown version as well. Tied in the wing case a little different on this one.
