Fished juniata R first time this summer have done 3 floats and have seen 5 - 18 inch plus fish pulled out! Only 1 that big for me! Need to start taking pics. Local stream S. Codorus has been dissapointing so this year only a few smallies. Local pond always produces some LMB.

Starting to explore Conowego Creek (York) with mixed results.

Wago has a lot of real nice spots. We hit it up just about every weekend. Lots of SMB and musky. Haven't gotten into a musky yet though. My spin fishing buddies have gotten a few.
