Rabbit Strip Streamer Question

I looked first, both in this forum and on the interwebs, but I could not find what I was looking for. I seem to recall someone discussing a streamer tied with nothing but a rabbit strip - tie it in at the rear for a tail, then palmer it up to a cone head, and tie it off. Does this ring a bell? It's kind of like a slump buster bunny leach thing, but for the life of me I can't find it. Am I imagining it, or has anyone tied something like this. Looking for a picture or instructions - I tried it, but just couldn't get it to look right.
