it say "a tad less than 26" aka in my book wouldn't break 20

I don't like being negative, but I didn't think that fish looked like a 26" 5-6lb fish. Always hard to judge though. When I saw it I thought it seemed pretty comparable to the big fish I caught. One funny difference is that I caught mine on the swing on a big green egg sucking leech. They were hitting everything that day. I assumed I had caught another char and here was this big grayling.
