Had a great day today in York County. I started off on Corderus creek but I didn't have any luck so I packed up and headed to another spot I recently discovered and came up big. I had a total of 7 wild browns in about 2 hours. The biggest one was over 16 inches and is my biggest wild trout since I started fly fishing in June. It took a #14 Black copper john. The pictures really don't do it justice. It was a beautiful fish. In the last picture I was able to get a shot of several brown trout in a pool ranging in various sizes. Pretty good for a stream not listed as a wild trout stream.
