Check out the mystic switch 5wt, I have my buddies right now, I also have his m-series 10' 7wt. I personally prefer the switch just because of the action of the rod, the switch has a more even flex, where the 10'er is an absolute nymphing stick, fast with the "tuned tip". The switch rod is super universal, single handed 7wt(with a rio gold on it dryflies lay pretty nice) or it really likes shooting heads in the 325-75gr.

Good luck.
