Thanks Streamerguy...it was a tough day fishing for me, I did ok, had a blast, just not a good numbers day, I did learn a lot and got to explore some new spots... didn't realize till the latter part of the float trip that they were keyed into baitfish..water was low and clear and I could see this fish pushing baitfish into real shallow water his back was out of the water, pitched a clouser out in front and a couple strips and hammered it...then preceded to do an impression of a rainbow trout..coming completely out of the water in three big leaps.. Great way to the end the trip with the biggest fish of the day, my buddy was spin fishing and caught more numbers...
