I tend to tie most my eggs on size 14 hooks. Sometimes using slightly more or less material. Low water I use 16's or a smaller eggs tied on that same size 14 hook. I like size 8 or 10 buggers... I crushed them on a size 10 black Nymph into the winter of last year that I never thought would have worked. I tied about 40 trillion of them for this year.

I'm still a total beginner but like you I've caught enough to be hooked forever.
