It's never too late. This is the first salvo and because it's an off year this year, there is a window for legislators to pass crap and pass it off as being good for the PA Economy.

Well they haven't helped the PA economy in years there is no chance for them to help the economy now, they never do.

Back to the purpose of this legislation, the Legislature want to have more control over agencies of the PA Government, the Environmental review is a new wrinkle to this effort, their purpose is to never allow another species to be listed as endangered or threatened.

The ultimate goal is to merge the agencies.
