Keep in mind this is a state legislature that refuses to pass a severance tax on the gas that gas companies take out of the ground, but they continue to look at ways to increase taxes on the Citizens of the Commonwealth.

They are gutless. If they weren't there would be a severance tax, and the state budget would be in surplus or at least balanced. But there is nothing in it for the legislature if they balance the budget and institute a severance tax.

There is nothing in it for the current legislature if we vote them out. My guess is that it's being pushed by representatives on the Fish and Game Committee who lead the committee.
