You need to add tippet. The end of the leader is the tippet, the thicker part that attaches to your fly line is the butt section. You can buy tippet on spools and add to the leader.

To make it last even longer and make it easier to attach tippet you can buy tippet rings, little rings about 2 mm (they vary a bit) that you tie on the end of the leader and then attach tippet to the ring.

Tippet on spools comes in the same size thicknesses as leader; 3X, 5X etc.
