If I'm fishing a 5x leader, to tippet ring, to 5x tippet. and decide I need 4x or 7x tippet, how would I about setting that up? Could I go down (4x tippet on 5x leader) and not cut it or move the ring?

Never used a tippet ring. Tie a double surgeons knot or blood knot between the leader and tippet. Keep it simple. No need to go nuts with hardware or knots until you start messing with bigger saltwater species.
