The X system works well for me.

Me too.

Just get 4 spools of tippet material: 3x, 4x, 5x, and 6x.

3x is heavy, good for streamers.

4x and 5x are sort of average, and what you use the most. I use 5x the most, by far, for PA trout fishing.

6x is light. Good for small flies, like size 18s, when the water is low and clear.

That's about it. With practice, you'll get the feel of which to use.
