Yikes ! Can't post a \*###@! photo.

I'm well within the size limit, correct file extension, tried changing upper/lower case...

After I have selected my file to attach and click on "UPLOAD" the entire page burps and reverts back to "no file selected", although the photo file remains next to the unchecked "REMOVE" box.

I know this post doesn't belong in this forum but I was hoping you could catch something dumb I was doing. My time on the paflyfish web site is minimal and I know you have a whole lot more experience here than I do.
