Yes, thanks for noting this; the J is catch and release "from the railroad bridge at the east (downstream) border of Ironville downstream to mouth" (PFBC regs). Camping in Rothrock and fishing Spruce too, one would be likely to be fishing the C&R, but not necessarily. I've fished alongside the local bait guys a time or two up above the no kill and we got on just fine. But you're right; this is an important point.
