Quent - After your posts on Richardson boxes last year, I decided it was time to get another one.

I stupidly sold the one I had years ago, and missed the functionality of it.

I ordered my new one through Flyfisher's Paradise in State College. Same price as ordering direct from Richardson.

I wasn't quoted a time frame on delivery, but since FFP often has boxes in stock, I was hoping I'd get mine a bit quicker. I bought a standard 4 tray configuration that FFP typically sells, and it must have been in line for production sooner than a new order - got it in under 6 months.

People often complain about the workmanship on manufactured goods declining over the years. Thankfully, Bob Hegedus builds his chest boxes with the same high quality standards as they ever were. He's a true craftsman, for sure.

Thanks for motivating me to get another box!
