I was swinging the leeches; they were size 8 beadheads.

I went back yesterday and fished top water exclusively--a fairly big cricket (size 6). I had a ton of takes, mostly sunfish, but most times the fly was too big for them to fit in their mouth. No big deal, I was looking for larger smallmouths. I ended up with 3.

Hopefully, the canoe/kayak/tube hatch ends this weekend, they have become an irritant.
