My version is the standard size, unpainted aluminum, with three trays. The first and second trays have 15 compartments. The third tray has one divider and two compartments. One compartment is 6" by 1 3/4 " and the other is 6" by 3 1/4 ". The main compartment is for tippet and the odds and ends I hate to fumble for with cold fingers. The narrow compartment is primarily for C & F style fly threaders. I like the threaders, but do not like the threader boxes.

The box is beautifully built and Bob paid great attention to the details.
