Does anyone fish this lake for bass, using a float tube, or is that pointless?

I fish the lake a fair amount and yes a tube will work. To be sure, the bass and larger sunfish do tend to be deeper in this lake in summer. Early in the am however (pretty much before sun up) there can be fish along the shoreline and small bass and sunfish stick close to shore all year. Try the tube in springtime, you'll likely have much better luck.
