Other waterproof sling pack?

Can anyone recommend a waterproof sling pack besides the LL Bean one and the WestWater by fishpond. The fishpond is a little on the pricer side at 150\$ and the LL Bean one looks like a satchel from Indiana Jones. I have been recently parking two cars with a buddy and walking warm water rivers to really pick apart water instead of floating. Problem is I get over my head frequently and need something I can store keys, wallet, flies and ect that I can trust will stay dry.
