I can say it's the best thing I ever did. I can't even imagine wearing a vest anymore. I can carry tons of flies, and it sort of forces me to go light on everything else, which is good, cause I never need that crap anyway.

Tippet, shot, nippers, forceps, a few spare leaders, floatant, flies. There is nothing else you need to have with you. And my Richardson carries all but the tippet and shot in a super light package that I don't even know I have on.

I do wear a waste pack with drinks for those super long trips.
