Any recommendations on tippet? When I fish a dropper rig, I use regular leader tied to my top fly and run fluoro tippet off the top fly to the dropper fly. I am bringing 5, 6 and 7 tippet...I have 8, but doubt I will use that.

You should always carry 3x and 4x. For rebuilding leader when you lose half of it in the shrubbery.

But also because for streamer fishing, 3x is ideal for the final tippet.

And 4x is good for a final tippet, when using big dry flies like Stimulators when the water is up after a rain.

5x is what you will probably use the most.

I'd bring the 6x along too.

But you can leave the 7x and higher at home.
