Nice ! Nice ! Nice ! Your report is very encouraging in that isn't it a little bit early for such good action on those patterns ? How about water temp. ? USGS Streamflow says water is hovering right around 70. I fish that stretch of the Lehigh and seem to do better a little further into September. I really like the Black Creek/Hayes Creek pool. Anybody fishing there please use extreme caution. The Lehigh is a noteworthy bad wading stream but the drop off right there is sudden, severe and deep.
