Hi Dave,

The editing software is called Wondershare and if you didn't take notice, there is a "watermark" that gets glued to your free download (google wondershare.) The editing software is basic, drag and drop for most things while editing, id suggest downloading it to try it out and if you like it the fee is only \$40.00- not too bad if you ask me- Avs video editor is another descent one, just basic stuff.

As far as everything else, I love to fish, love hooking others into fish, and I love catching it all on film.
