Its fairly good just down from the hydro plant, there's a rif or two down before you get into the flats. Then there is what I call the flats. Not a whole lot happening there for the most part. I usually park at the Corbin Island access and fish the back sides of both islands. The up stream islands usually pays off on the far shore under the tree branches for a few trout early in the season and now Smallmouth. It's worth it this time of year for bass but thats about it. From there on down to Point Access there are a few holes but for the most part it's just a huge solar panel. If the waters is up on the tail water all bets are off. It's a different world altogether. I really don't think there is any draw downs in the plans anytime soon. so the water should be low n slow. You've got about a 7+ mile drive once you turn off 22. Good luck.
