Ron, don't get defensive. Read the guidelines. This forum is meant to be a database of useful information. Correct titling. which you did, is only one element. The substance of the report should:

1. Identify the approximate location;
2. Describe the water and atmospheric conditions;
3. Describe any hatches or benthic phenomenon;
4. Be creative and interesting (optional).

The optional #4 alone is not sufficient. Thanks for supplementing.
