First, let me say that my post was from my perspective and experience in dealing with the nursery. My opinions are my own.

My response was mainly directed towards grobe33 and he has since sent me a PM. I just found it a little disheartening that there is work ongoing which was seemingly being overlooked and discounted by his post. CRTU doesn't provide fish strictly for the "meat hunters".

I am not opposed to additional stocking or efforts by other organizations, but I will point out that there is a substantial source of fish essentially provided at no cost by PA FBC. With some attention, support and volunteers, the nursery is already there for this purpose.

YoughRiverGuide, I am not sure who you reached out to but Scott Hoffman the chapter president is very involved and in my experience responds quickly when contacted. I will PM his email address. There was a problem with the nursery this spring so that's why CRTU didn't stock. Vandalism is an issue and the chapter is trying to resolve this.

I am aware of Laurel Highlands contribution to the float stocking for which I am grateful.
