Oh crap, I forgot about that. When are you going again? I'm going down towards the end of October thanks to recent events.

Be cool to hook up down there.

My experience has shown that what you say holds sand, but only in the smaller/smallest infertile streams.

Think Falling Springs and Big Springs. Plenty small but chock full of food. Plenty of trout. Quite a few bigguns.

You fish hard enough down there in the Smokies and sooner or later instead of the smaller bows and brookies, you'll bump into one whale of a brown.
