A milsurp bread or gas mask bag does wonders. I spent \$12 on the ubiquitous finn model.

The waist strap works for a shoulder strap, and the leg strap works for your waist, or double them up and use it like a waist bag. Optionally you can use both straps on opposite shoulders, but that seems to be alot of work.

For an extra \$20 you can get a gasmask inside to turn into a device you can use for all sorts of stupid purposes unfitting for a family friendly board.
