Seriously beautiful fish man!!!

And squash, I feel your pain, between working on my truck (head studs, clutch, rear main, upgraded compressor wheel, egr delete and oil cooler), and a death in the family. No fishy for me either, really sucks, but I was pointed onto a local brookie stream up here by me! May have to go inspect that once I get through corporate doing thier visit to the complex. Hoping they get here today.

Sounds like you're working on 6.0.
