Extra Pair of Waders

For the entire summer I've been fishing my waders (right side) have a hole somewhere and my leg gets soaked each and every time I wade. I couldn't find it to try to address it so I sent them back last Friday for repair. Got an email that we are looking @ 4 - 6 weeks and realized I'm gonna need an extra pair of waders ... which will also benefit me down the road.

Do most of you guys have an extra pair?

Any recommendations in the \$100 range?

Much appreciated
