9 Weight ok for Fall surf run?

I was going through my old fly rods and found a Sage Graphite 2 9 foot 9 weight. I haven't fished for quite a few years (this year i've been at it full bore!) and had been thinking about getting a less expensive 10 weight for my saltwater trips. Would the 9 weight hold up to fly fishing the beaches of NJ?

I'm not planning on doing any fishing from the jetties, strictly from the beach. I'm targeting bass and blues when I am out (usually at IBSP).

Thanks in advanced for your opinions!
