Now I never said there was no fish in PA tribbs. There were less than in other years but buy no means did I say none. With that being said I walked at least 3 miles on chautauqua and litterly caught nor saw a fish. I am sure a few were present but the numbers were way off even for a average below average years.

To write it completely off to people don't know how to fish isn't fair. The NY tribbs were dead first week of november plain and simple.
