I am not trying to promote any one fly shop, but I think Leland will send you rods and let you try them. If you do not like it just return it for a full money back refund. Call them and find out. I have two small stream rods. I have a 5' 2wt made by JP Ross Fly Rods, and a 6'10" 3wt sage TXL. The sage is a 4 piece and the JP Ross is a 2 piece. Both rods are awesome. I love the JP Ross for extremely small streams anywhere from 5 to 30 feet across. Let me know if you have any questions.

Thanks,
