Sorry, Grobe, you misunderstand me. And surely this is my fault. I stick to my original comment that your effort, like those of the TU section are worthy. I wish you luck, but I guess what I'm saying is this is an opportunity for Nemaocolin to embrace CRTU. If that is what this is about-- kudos! But if this is a way of saying: "we don't agree with your madness/methods," then I have a hard time deciding to support you in this civil war.
