I fished the Susky yesterday afternoon/eve 4:15 til 8:00 at duncannon and did well for the susky about 12 smb, largest 17-18 inch with about 8 around 9 to 10 inch. fishing was restricted to spinning rods wind was 10-20 right down the river. had a really good fury of activity from 7:20-7:45 right around sunset caught 5 in that time frame and lost 3 or 4. I may be fortunate in the fact that I never fished the river during it's heyday so i was happy with the evening. All the bass were very healthy weight and i thing i saw 1 very small sore.
