first report for me. big skunk for the night hit north Monmouth county. there was bait in the water. close to shore but, couldn't figure out what it was. to small to be mullet but to big to be silversides and bay anchovies, my guess was some early peanuts. maybe a few fish under them. stuck around them cause they were then in between to jetties maybe a 100 yards apart. threw the whole box at them. used fast slow and floating lines. nada. my guess it just some fluke under them giving them a little action.

all I can say is I am happy to see some bait around. definitely not anywhere the run so keeps my hopes up. found another good spot to hit later in the year.
