Hey, guys. I have a quick question I'm hoping anyone can help with.

I have an Orvis Battenkill on my 5wt rod and have been running into the problem that I try to quickly pull line off of my reel to make a longer cast or let line out and it quickly unravels in the reel and tangles.

I'm not using the reel any different than my normal reels, so how do you avoid this?

I spent a lot of time this past weekend pulling the line out and then re-reeling it in.

Help :)
