So, my girlfriend and I are heading to Harmons next wed for the trip I won as a prize at the JAM! I extended the stay a couple nights and made it into a nice long weekend, the folks at Harmons were very nice to deal with. I'm excited to head down, I know the area well, but I've never fished there, only nearby brookie streams, SO, for those that have fished there, what should I have with me for those big stockies??

Hoping for nice weather so we can take the bike and do some riding as well as fishing. probably head up to dolly sods for a nice hike as well. The girlfriend doesn't mind fishing, but fishing all day everyday ain't gonna cut it!!
