Montague ferrules are usually easy to identify. It would be easy enough to tell from pictures if that is what it is/was.

You said no markings, but are there any shadows of labels on the butt section?

What's the reel seat look like?

The vast majority of Montague rods are not worth much money, but will fish well enough. I've rebuilt a few. Some I liked, some I didn't.

An automatic reel of some sort should balance it fairly well.
