I got a cheap 9' 8 wt. rod and reel set from Cabelas, Wind River is the name, I think. This is my third year on it fishing for kings and cohos on the SR. I have yet to get up there in prime steelhead season but plan on that this year. Kings and cohos really beat up and rod and reel but this one has been adequate thus far. I would not spend a bundle on a rod and line but a decent reel is helpful and would be a good investment.
