Do we have any musky hunters in the state college area? I'm up at school right now and I've got all my toothy critter gear, but I have no idea where to fish for these things. I've heard of them in bald eagle creek (I think that was it), and I know there's some up past Altoona in Prince Gallitzin, but other than that I'm clueless. If anyone could point me in the right direction, or would like to do some musky fishing this fall, shoot me a PM. I've gotta land one of these greased pigs.
