I tie almost all my own flies and have for the last 25 years. I love to tie them almost as much as I do fishing . I also try to get as much of my own material as I can during hunting season. I have saved A few deer hides and lots of tails to use and try to shoot all my own pheasants ,grouse , rabbit and turkey to use. I traded some flies to a cousin of mine in Alaska for A caribou hide from one he shot. And when I do use flies I didn't make my own I try to trade A few friends for flies that they have done. My wife thinks I am nuts for how far I take it but I just love the fact of getting fish with my own,.
