I was kind of backwards about things i started out tying at 12 years old with a kit i got for my birthday. 3 years later i finally bought a fly rod. Im not sure why i did it like that but tying was my first love. I remember my first trout on my own fly, its a feeling i still get everytime i land a fish. 10 years later i tie almost daily and for some shops also. No feeling like tying a dozen size 16 adams for me.
