If you miss fall fishing in the C&R FFO Area, it was not the only game in town. As I have mentioned to anglers at various times, all one need do is fish from Warwick Park, where I have heard in the past there are trout throughout the summer (have not verified this) to the upper stocking limit in the SGL. The stream holds spring stocked trout through the summer. Although that seems improbable to some anglers in a stream where bait fishing is allowed, it is true. I stood on the St Peters foot bridge today and watched a SMB and two trout moving about in the pool below. Years ago when we extended the upper stocking limit from St Peters Rd upstream into the SGL for about a half mile or so, we did so because we found holdover RT in summer or fall that had moved that far upstream and were in beautiful condition.
