Allow me revise what I said earlier. I've thought a little about the markings on your rod and I believe the number 1308 1/2 is meaningful. the last 3 digits refer no doubt to the length of the rod: 8 1/2 feet. It is quite possible that the first three digits refer to the line weight intended for the rod: 130 grains, which would make it more of a 5-weight rod.
