Try it with a 5, 6 or even 7, WF, DT whatever you have, this ain't rocket science. Lay down the rod sock, pace of 3 rod lengths and drop your hat, another two lengths and pile some leaves or sticks.

Tie on some yarn with 5x and see which line works best for you at both targets. Decent enough caster? You'll be able to make all three work, choose the one that feels best for you and make a mental note...
