Most people in the towns have no idea there are trout in the headwaters. I mention it in casual conversation and they had no idea.

I live right at the headwaters and have been seeing wild brook trout for many years. I live above where any stocking took place. I've even spotted a few that I've seen time and time again in the same lies, quickly heading to cover once I'm discovered.

Because of the sewage upgrades and the new water treatment it can only get better.

John
