looks like instead of rain, mud fell from the sky.

I saw that on the cam... The downside to the rain for the Erie area is that they are projected to get a ton of it in a short period of time. That helps move some fish into the lower creeks. But, it's been so dry that it will not help as much as we want it too. I just want to push the brakes on this line of rain and make it slowly drop rain for a couple of days.

Oh well, it will get some fish in the creeks. It will not result in the numbers we want, but it will be something for people to stand shoulder to shoulder over 🙏
